

LEYMASTER ENVIRONMENTAL CONSULTING, LLC

July 23, 2018

Mr. Michael Weber
Duke Realty
200 Spectrum Center Drive, Suite 1600
Irvine, CA 92618

Re: PHASE I SITE ASSESSMENT REPORT
13131 Los Angeles Street
Irwindale, California 91706

Dear Mr. Weber:

We are pleased to enclose our Phase I Environmental Site Assessment Report for the above-referenced property.

Leymaster Environmental Consulting appreciates the opportunity to have been of assistance and looks forward to working with you again. Please call if you have any questions regarding this report.

Sincerely,

Mark Leymaster
Environmental Professional

Travis Knight
Staff Engineer

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

**13131 Los Angeles Street
Irwindale, California 91706**

1. **Summary**

Leymaster Environmental Consulting, LLC, performed a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations set forth by Mr. Michael Weber, on behalf of Duke Realty for the property at 13131 Los Angeles Street in Irwindale, California 91706 (“Property”).

The Phase I ESA is designed to provide Duke Realty with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the Property. This assessment was conducted utilizing generally accepted ESA industry standards in accordance with ASTM E 1527-13, Standard Practice for Environmental Assessments: Phase I Environmental Site Assessment Process and EPA Final All Appropriate Inquiries (AAI) standard practices. Any exceptions to or deletions from this practice are described in *Section 2.4* of this report.

Development of the Property began in 1967 when the California Portland Cement Company, a manufacturer of cement, ready mix concrete, building and construction supplies, and concrete products began operations. Over the years, there have been several ownership changes; however, the operations have remained the same. Previous occupants include Spancrete of California, United Ready-Mix Concrete, Hanson Spancrete Pacific Inc., the Heidelberg Cement Group and Clark Pacific. The Property has been unoccupied since July 2017.

Two 1,000-gallon underground fuel tanks were installed in 1967 and removed in 1986. The tanks were removed under the oversight of the Los Angeles County Department of Public Works (DPW). Analytical results from soil samples collected during tank removal activities indicated concentrations of total petroleum hydrocarbons (TPH) ranging from 46.5 parts per million (ppm) to 254.2 ppm. Depth to groundwater was reported at 150 to 175 feet below grade. The DPW issued a No Further Action (NFA) Letter in December 1986.

Following tank removal activities, a 4,000-gallon dual compartment fuel tank was installed in the former tank excavation area. This tank and the related dispensers and piping were removed in February 2004 under the oversight of the DPW. Soil samples collected beneath the tank and dispensers were below detection limits for TPH as gasoline, TPH as diesel, volatile organic compounds (VOCS), fuel oxygenates and organic lead. Soil samples were not collected along the piping run because the distance was less than 20 feet. The DPW issued a NFA letter in March 2007. Based on this, the former tanks do not represent an environmental concern.

The Property is listed in the HAZNET, LACHMS, NPDES, WDS, WIP, FINDS ECHO and CIWQS databases searched by Environmental Data Resources, Inc. (EDR). In each case, no substantive information was provided that would indicate a significant environmental threat to the Property.

The Property was also included in the SWEEPS, UST and HIST UST databases searched by EDR. Inclusion in these databases is resulting from the former underground storage tanks discussed above and does not represent an environmental concern.

No environmental concerns exist as a result of the sites listed in the EDR Report and supplemental agency review attachments of this report due to either the distance from the Property, the absence of violations, or responsible parties have been identified for the environmental concern.

This Phase I ESA revealed no evidence of environmental conditions associated with the Property. No further investigation is recommended at this time.

2. **Introduction**

Leymaster Environmental Consulting, LLC (LEC) was retained by Mr. Weber, on behalf of Duke Realty to conduct a Phase I ESA of the property at 13131 Los Angeles Street, in the City of Irwindale, California 91706 (Local Area Map – *Appendix A*). The protocol used for this assessment is in general conformance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessments Process and EPA Final All Appropriate Inquiries (AAI) standard practices.

2.1 Purpose

The purpose of this ESA was to identify existing or potential recognized environmental conditions (as defined by ASTM Standard E 1527-13) in connection with the Property. LEC understands that the findings of this assessment will be used by Duke Realty in connection with a pending financial transaction involving the Property.

2.2 Detailed Scope of Services

The scope of work for this ESA is in general accordance with the requirements of ASTM Standard E 1527-13 and EPA AAI. LEC warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying environmental conditions.

No other warranties are implied or expressed.

2.3 Significant Assumptions

There is a possibility that even with the proper application of these methodologies there may exist on the Property conditions that could not be identified within the scope of the assessment or that were not reasonably identifiable from the available information. LEC believes that the information obtained from the record review and the interviews concerning the Property is reliable. However, LEC cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The methodologies of this assessment are not intended to produce all inclusive or comprehensive results, but rather to provide Duke Realty with information relating to the Property.

2.4 Limitations and Exceptions of Assessment

The principal of Leymaster Environmental Consulting, LLC whose seal and signature appear hereon, has reviewed this report. No staff member of LEC has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties, or which may be responsible for environmental issues identified during the course of this investigation, or has any personal bias with respect to the parties involved. Phase I environmental assessments are non-comprehensive by nature and are unlikely to identify all environmental problems or eliminate all risk. This report is a qualitative assessment. LEC offers a range of investigative and engineering services to suit the needs of our clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help the Client understand and better manage risks. Because such detailed services involve greater expense, we ask our clients to participate in identifying the level of service, which will provide them with an acceptable level of risk. Please contact the signatories of this report if you would like to discuss this issue of risk further.

LEC performed this Phase I ESA in general accordance with the guidelines set forth in ASTM E 1527-13 and EPA AAI, and subsequently approved by you as our Client. The conclusions represent professional judgments and are based upon the findings of the investigations identified in the report and the interpretation of such data based on our experience and expertise according to the existing standard of care. No other warranty or limitation exists, either expressed or implied. Environmental issues not specifically addressed in the report were beyond the scope of our work and were not included in our evaluation. The findings and

conclusions contain all of the limitations inherent in the methodologies that are referred to in ASTM E 1527-13.

2.5 Special Terms and Conditions

The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the client. Unless specifically stated otherwise in the report, no chemical analyses were performed during the course of this ESA.

Some of the information provided in this report is based upon personal interviews and upon research of available documents, records, and maps held by the appropriate government and private agencies. The interviews and research are subject to the limitations of historical documentation, availability, and accuracy of pertinent records and the personal recollections of those persons contacted.

2.6 User Reliance

All reports, both verbal and written, are for the benefit of Duke Realty, its successors and assigns. Any party other than Duke Realty who would like to use this report shall notify Leymaster Environmental Consulting, LLC of such intended use in writing. Based on the intended use of the report, LEC may require that additional work be performed and that an updated report be issued. Noncompliance with any of these requirements by the aforementioned parties or anyone else will release LEC from any liability resulting from the use of this report by any unauthorized party.

3. **Site Description**

3.1 Location and Legal Description

The Property is located on the north side of Los Angeles Street in the City of Irwindale, California. The cross streets are Rivergrade Road and Littlejohn Street.

The Property is recorded with the County of Los Angeles Tax Assessor's Office as Assessor's Parcel No. 8535-020-007. See *Environmental Lien Report* in *Appendix D* for a complete description.

3.2 Site and Vicinity General Characteristics

The Property is located in a commercial and industrial area in the City of Irwindale, California. Topography at the site is flat with commercial and or industrial developments on the east and west adjacent properties. The Vulcan Materials quarry is on the south adjacent property and the San Gabriel (605) Freeway is to the north.

3.3 Current Use of the Property

The property has been unoccupied since July, 2017.

3.4 Descriptions of Structures, Roads, Other Improvements

The Property consists of approximately 24.5 acres. Development includes an approximate 20,000 square-foot brick and concrete office building with a flat roof and steel-framed windows and doors at the south end of the Property. A small mobile office is attached at the northeast corner of the building. An approximate 2,883 square-foot office building and an approximate 9,618 square-foot maintenance building are present to the east of the main building. A covered outdoor former welding shop is present east of the maintenance building. Parking lots are at the south end of the Property. The remaining area is undeveloped and was used for product process lines. Large concrete mixing equipment is present at the site.

The following utilities service the site:

Electric:	Southern California Edison
Gas:	Southern California Gas Company
Water:	Valley County Water District
Sewer:	Los Angeles County Sanitation District

3.5 Current Uses of Adjoining Properties

During the vicinity reconnaissance, LEC observed the following land use on properties in the immediate vicinity of the Property.

North: Rivergrade Road and the San Gabriel (605) Freeway.

South: Los Angeles Street. Beyond is Vulcan Materials, located at 13000 Los Angeles Street.

East: Lincoln Pacific Builders and RenyMed, located at 4501 and 4505 Littlejohn Street, respectively. Multi-tenant light

industrial developments, located at 4507, 4509, 4601-4621 and 4701-4801 Littlejohn Street. Gardensun USA, Proper Enlightenment Meditation Center of California, Inc., Comeco Inc., and Laurence Doors, located at 4513, 4515, 4517 and 4525 Littlejohn Street, respectively.

Jewel Tunnel Imports, Golden Packaging Plus, and NJ Investments located at 13100, 13110 and 13111 Spring Street, respectively. Multi-tenant light industrial and office developments located at 13121, 13130-13180 and 13211-13221 Spring Street.

Multi-tenant office developments, located at 13100-13300 Brooks Drive.

West: Southern California Edison Operations Support and Supply Chain Management Facility, located at 13025 Los Angeles Street.

4. User Provided Information

Pursuant to ASTM E 1527-13 and EPA AAI, LEC requested the following site information from Mr. Michael Weber on behalf of Duke Realty (user of this report).

4.1 Title Records

Ticor Title Company provided a Preliminary Title Report. No items of an environmental concern were noted. Although a Chain of Title was not reviewed, it does not represent a data gap because the historical uses have been identified through other resources.

4.2 Environmental Liens or Activity and Use Limitations

LEC requested information from Mr. Weber regarding knowledge of environmental liens, activity and use limitations for the Property. Mr. Weber was not aware of any environmental liens associated with the Property and had no knowledge of any use or activity limitations. Additionally, according to the EDR Lien Report and the title report, no environmental liens were identified for the Property.

4.3 Specialized Knowledge

LEC completed a Phase I ESA of the Property in 2016.

4.4 Commonly Known or Reasonably Ascertainable Information

LEC inquired with the site contact, Mr. Weber regarding any specialized knowledge of environmental conditions associated with the Property. Mr. Weber was not aware of any environmental conditions associated with the Property. An Internet search of the Property did not reveal any pertinent additional information.

4.5 Valuation Reduction for Environmental Issues

LEC inquired with the site contact, Mr. Weber regarding any knowledge of reductions in property value due to environmental issues. Mr. Weber indicated the Property is valued at fair market value.

4.6 Owner, Property Manager, and Occupant Information

The owners of the Property are TW Los Angeles, LLC (as to an undivided 50% interest), San Pietro Properties, LLC (as to an undivided 37.5% interest) and Garmatt Properties, LLC (as to an undivided 12.5% interest).

4.7 Reason for Performing Phase I ESA

The purpose of this Phase I ESA was to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E 1527-13) in connection with the Property. This ESA was also performed to permit the user to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the “*landowner liability protections,*” or “*LLPs*”). ASTM Standard E 1527-13 constitutes “*all appropriate inquiry* into the previous ownership and uses of the Property consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35) (B). User continuing obligations, as defined in the 2002 Brownfield Amendments, consist of the following:

- Complying with land use restrictions and institutional controls;
- Taking “reasonable steps” with respect to hazardous substances releases;
- Providing full cooperation, assistance, and access to persons that are authorized to conduct response action or natural resource restoration;

- Complying with information requests and administrative subpoenas; and
- Providing all legally required notices.

LEC understands that the findings of this assessment will be used by Duke Realty in connection with a pending financial transaction involving the Property.

4.8 Other

The users did not provide any other information.

5. **Record Review**

A Government Records Report by EDR for the Property and surrounding area has been provided as *Appendix B*. Information pertaining to the Property and neighboring sites not included in the EDR report has been provided as *Appendix C*.

5.1 Standard Environmental Record Sources

A complete listing of sources has been provided as *Appendix B*.

The Property is listed in the following databases searched by EDR.

The HAZNET list is generated from hazardous waste manifests received from the Department of Toxic Substance Controls. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 to 1,000,000 annually, representing approximately 350,000 to 500,000 shipments. Data from non-California manifests and continuation sheets are not included at the present time. Data are from manifests submitted without correction, and therefore may contain some invalid values of data elements such as generator ID, TSD ID, waste category, and disposal method. Spancrete of California is included in this database from 1997 to 2000 for the disposal of varying quantities of other organic solids and an unspecified oil-containing waste. No violations or Notices to Comply were reported. Clark Pacific is included in 2013 and 2014 for the disposal of varying quantities of other organic solids and waste oil/mixed oil. No violations or Notices to Comply were reported. Hanson Structural Precast is included from 2001 to 2016 for the disposal of varying quantities of other organic solids, off-specification, aged or surplus organics, waste oil, mixed oil and 0.41 tons of tank bottom waste. No violations or Notices to Comply were reported.

Los Angeles County Hazardous Materials System (LACHMS) identifies hazardous materials users. Spancrete of California Inc. is included in this database under four Facility IDs. Permit status is shown as closed or removed for each facility; no other information is provided. United Ready Mixed Concrete is included under two Facility IDs. Permit status is closed; no other information is provided. Heidelberg Cement Group is included as a closed facility. No other information is provided.

Statewide Environmental Evaluation and Planning System (SWEEPS) is an underground storage tank listing which was updated and maintained by a company contracted by the SWRCB in the early 1980's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list. Hanson Structural Precast Inc. is included in this database resulting from former underground storage tanks. No other information is provided.

The Underground Storage Tank (UST) database contains registered underground storage tanks regulated under Subtitle 1 of the Resource Conservation and Recovery Act. Spancrete of California is included in this database under Facility ID 20651 resulting from former underground storage tanks. No other information is provided.

The Historical Underground Storage Tank (HIST UST) list. Hanson Structural Precast Inc. is included in this database. GeoTracker data indicates two 1,000-gallon fuel tanks were installed at the Property in 1967. No other information was reported. These tanks were removed in 1986.

The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities. Clark Pacific Irwindale is included in this database. No violations or Notices to Comply were reported. Hanson Structural Precast Inc was also included in this database. No violations or Notices to Comply were reported.

NPDES: A listing of National Pollutant Discharge Elimination System (NPDES) permits, including stormwater. Clark Pacific Irwindale is included as a terminated facility. No other information is provided. No violations or Notices to Comply were reported. Hanson Structural Precast Inc is also included in this database with no reported facility status. No other information is provided. No violations or Notices to Comply were reported.

ECHO: Enforcement & Compliance History Information (ECHO) provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. Hanson Spancrete Pacific Inc. is included in this database. No other information is provided. No violations or Notices to Comply were reported. Clark Pacific Irwindale is also included in this database. No other information is provided. No violations or Notices to Comply were reported.

Facility Index System (FINDS) is a computerized inventory of all facilities that are regulated or tracked by the U. S. Environmental Protection Agency. The FINDS list contains both facility information and “pointers” to other sources that contain more detail. The FINDS list is a compilation of other database sources. The FINDS list indicates that the subject site is also on the Facility Registry System (FRS), Biennial Reporting System (BRS), Toxic Chemical Release Inventory System (TRIS) and the Resource Conservation and Recovery Act Information system (RCRAINFO). Inclusion on these lists does not by itself indicate a significant environmental threat to the subject site. Hanson Spancrete Pacific Inc. is included in this database. No other information is provided. No violations or Notices to Comply were reported. Clark Pacific Irwindale is also included in this database. No other information is provided. No violations or Notices to Comply were reported. Hanson Structural Precast Inc is also included in this database. No other information is provided. No violations or Notices to Comply were reported.

The California Waste Discharge System (WDS) list sites which have been issued waste discharge requirements. Hanson Structural Precast Inc. is included in this database. No violations or Notices to Comply were reported.

Well Investigation Program (WIP) database lists cases in the San Gabriel and San Fernando Valley area. Hanson Structural Precast Inc. is included as an historical file status. No other information is provided.

Sites listed by EDR within 1/2 mile of the Property for NPL and CERCLIS and within 1/8 mile for all other databases are discussed below.

Superfund, also known as the National Priority List (NPL) database, is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA:

- San Gabriel Valley (Area 2) Sunset & San Bernardino Freeway

Resource Conservation and Recovery Information System – Large Quantity Generator (RCRIS-LQG) report contains information pertaining to facilities that generate more than 1,000 kilograms of EPA regulated hazardous waste, or over 1 kg of acutely hazardous waste per month:

- Southern CAL Edison 13025 E. Los Angeles Avenue

The Resource Conservation and Recovery Information System – Small Quantity Generator (RCRIS-SQG) database lists sites that generate between 100 kilograms and 1,000 kilograms of EPA regulated hazardous waste per month:

- UPM Inc. 13245 Los Angeles Street
- MacDonald Carbide Company 4510 Littlejohn Street

The Leaking Underground Storage Tank (LUST) Incident Report contains an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System:

- Industrial Asphalt 13130 Los Angeles Street
- UPM Inc. 13245 Los Angeles Street
- Universal Plastic Mold 13425 Los Angeles Street
- SCE – Irwindale Corp Warehouse 13025 Los Angeles Street

The Underground Storage Tank (UST) database contains registered underground storage tanks regulated under Subtitle 1 of the Resource Conservation and Recovery Act:

- Bob Zadium Trucking 4600 Rivergrade Road
- SCE – Irwindale Corp Warehouse 13025 Los Angeles Street

Aboveground Petroleum Storage Tank Facilities (AST) is a listing of aboveground storage tank petroleum storage tank locations.

- SCE Irwindale Automotive Service 13025 E Los Angeles Street
- Not Reported 13025 E Los Angeles Street

Statewide Environmental Evaluation and Planning System (SWEEPS) is an underground storage tank listing which was updated and maintained by a company contacted by the SWRCB in the early 1980's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list:

- Bob Zadium Trucking 4600 Rivergrade Road

- Industrial Asphalt 13130 Los Angeles Street
- Brooks Products, Inc. 4505 Littlejohn Street
- SCE Irwindale Automotive Service 13025 E Los Angeles Street
- UPM Inc. 13245 Los Angeles Street

The Historical Underground Storage Tank (HIST UST) list:

- Bob Zadium Trucking 4600 Rivergrade Road
- Industrial Asphalt 13130 Los Angeles Street
- Brooks Products 4505 Littlejohn Street
- SCE Irwindale Automotive Service 13025 E Los Angeles Street
- SCE – Irwindale Corp Warehouse 13025 Los Angeles Street
- UPM Inc. 13245 Los Angeles Street

The California Facility Inventory Database Underground Storage Tank (CA FID UST) list contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board:

- Brooks Products 4505 Littlejohn Street
- UPM Inc. 13245 Los Angeles Street

US Mines: Mines Master Index File. The source of this database is the Dept. of Labor, Mine Safety and Health Administration:

- Calmat Company None Given

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTITES]:

- Industrial Asphalt 13130 Los Angeles Street
- UPM Inc. 13245 Los Angeles Street

Well Investigation Program database lists cases in the San Gabriel and San Fernando Valley area:

- J-Mark Computer 13111 Brooks Drive
- United Air Condition 13200 Brooks Drive
- Control Optics 13211 Brooks Drive
- Aslan Computer Corporation 13300 Brooks Drive
- Quik Strap Inc. 13300 Brooks Drive
- Western Power System 13311 Brooks Drive
- AMS, Inc. 4801 Littlejohn Street
- Medi/Nuclear Corp. 4501 Littlejohn Street
- Pack West 4505 Littlejohn Street

- MacDonald Carbide 4510 Littlejohn Street
- Gibraltar Products 4525 Littlejohn Street
- SCE Irwindale Automotive Service 13025 E Los Angeles Street
- H & L Company 13263 Los Angeles Street
- Universal Plastic Mold 13245 Los Angeles Street

None of the sites listed in the Orphan summary page of the EDR report were noted in the general area of the Property.

5.2 Additional Record Sources (See *Appendix F*)

5.2.1 *California Department of Toxic Substances Control*

The Department of Toxic Substances Control (DTSC) offices located in Chatsworth and Cypress, California reported no files or records associated with the Property.

5.2.2 *South Coast Air Quality Management District*

A search of the South Coast Air Quality Management District's Facility Information Detail (FIND) database revealed the following files.

Facility ID 173790 Clark Pacific

Inactive permits for concrete batch equipment, a cement storage tank and activated carbon adsorber equipment. No violations or Notices to Comply were on file.

Facility ID 126830 Hanson Spancrete Pacific Inc.

Inactive permits for concrete batch equipment, a cement storage tank, activated carbon adsorber equipment, service station storage & dispensing and amine treating. No violations or Notices to Comply were on file.

Facility ID 760 Spancrete of California

Inactive permits for cement conveying, concrete batch equipment and dry filter. No violations or Notices to Comply were on file.

Facility ID 39859 Spancrete of California

Inactive permits for service station storage & dispensing, amine treating, concrete batch equipment, activated carbon adsorber,

cement storage tank and control ETO sterilization hospital equipment. No violations or Notices to Comply were on file.

5.2.3 Los Angeles County Department of Public Health

The Los Angeles County Department of Public Health reported files for Spancrete of California and Hanson Structural Precast.

Spancrete of California

On file was an inspection report dated 1994. A Notice of Violation was issued requesting that the company provide a system for the legal disposal of waste from an onsite steam cleaner. Also on file, was an inspection report dated 1988. Spillage from hydraulic fluid tanks onto the ground was noted, and a Notice of Violation to contain and properly dispose of wastes was issued. Hydraulic fluid does not represent an environmental concern.

Hanson Structural Precast

On file were Hazardous Materials Inventory Statements for 1999-2010. The following materials were included:

- Triethanelamine
- Sodium Dodecylbenzene Sulfonate
- Oxygen
- Transmission Fluid
- Motor Oil
- Hydraulic Oil
- Calcium Nitrate
- Waste Oil
- Lighosulfonate
- Natural Gas Methane

Additionally, a Notice of Violation for failure to submit an inventory of hazardous materials, dated November 2012, was on file.

Also on file, were routine inspection reports, two Business Owner/Operator Identifications dated 1999 and 2011, three Facility Information Reports dated 2004, 2010 and 2012, and a Business Plan Annual Renewal Certification dated 2010. No items of an environmental concern were noted.

Clark Pacific Irwindale

On file were routine inspection reports and four Notices of Violation, all labeled minor. These violations are as follows: failure to electronically submit emergency response procedures, failure to electronically submit a site map, failure to operate facility in a manner that minimizes a fire, explosion, or a release of hazardous waste, and failure to properly label hazardous waste accumulation containers and portable tanks. A subsequent update to these violations was on file indicating that no further action is required, dated October 2016. A copy of this update is included in *Appendix F* of this report.

Also on file, was an inspection report stating the company was out of business, dated October 2017.

5.2.4 Los Angeles County Sanitation District

The Los Angeles County Sanitation District reported no files or records associated with the Property.

5.2.5 Los Angeles County Department of Public Works

A search of the County of Los Angeles Department of Public Works' CleanLA database revealed the following files associated with the Property. LEC reviewed the physical files at the Department of Public Works.

File No. 009315-009116 Spancrete

This file contained documentation on the removal of two 1,000-gallon fuel tanks in November 1986. Reportedly, the tanks were installed in 1967. The tanks were removed under the oversight of the Department of Public Works (Closure Permit No. 2147B). Soil samples collected beneath the tanks contained TPH ranging from 46.5 ppm to 254.2 ppm. Depth to groundwater was reported at 150 to 175 feet below grade. The Department of Public Works issued a NFA Letter in December 1986. A copy of the NFA letter is included in *Appendix F* of this report. Following tank removal activities, a 4,000-gallon dual compartment fuel tank was installed in the former tank excavation.

Also on file was an application for an Industrial Waste Permit. The application was for a closed system, which reclaimed wastewater generated from washing down of equipment. Constituents of the

waste discharge are reported as “concrete out of specification”. Raw materials used were reported as rock, sand, cement and water. No items of an environmental concern were noted.

File No. 009315-039989 Hanson Spancrete Pacific Inc.

On file was a Notice of Non-Compliance (V403785) for non-compliant conditions of material configurations that resulted in non-fiberglass metallic material in contact with backfill material. The non-compliance notice required an inspection, dated for February 2004.

This file also contained documentation on the removal of the 4,000-gallon fuel tank installed in 1986. The tank along with the related dispensers and piping were removed in February 2004 under the oversight of the Department of Public Works (Closure Permit No. 397470). Soil samples were collected beneath the tank and dispensers. No piping run samples were collected because the distance was less than 20 feet. The analytical results were below detection limits for TPH as gasoline, TPH as diesel, VOCs, fuel oxygenates and organic lead. The Department of Public Works issued a NFA letter in March 2007. A copy of the NFA letter is included in *Appendix F* of this report.

File No. 009315-054475 Heidelberg Cement Group

Industrial Waste Permit No. 000652462 issued in July 2010. The permit was issued for a closed loop recycling system. Waste constituents were reported as concrete and water. A Notice of Violation Order to Comply was issued on May 11, 2010 notifying the new owner that a new Industrial Waste Disposal Permit is required after a change of ownership. No items of an environmental concern were noted.

A 2016 Phase I ESA done by LEC found on file two Notices of Non-Compliance that were issued on April 7 and 29, 2010 notifying Heidelberg that proof of disposal is required for the Hotsy tank/pit sludge. No items of environmental concern were noted.

File No. 009315-058175 Clark Pacific

On file was Industrial Waste Permit No. 000750091 in July 2013. The permit is for a closed loop recycling system. The system includes a water-holding tank with a high-level alarm. The permit notes the system is to be cleaned out every six months. Wastewater

producing operations are described as washing of equipment and the method of disposal for wastewater is offsite. No items of an environmental concern were noted.

An administrative Notice of Violation was issued in February 2014. The notice indicates the Hotsy tank is no longer in use; however, equipment washing is still done. Also on file, was a Self-Monitoring report for 2013.

File No. 0009315-020651 Spancrete of California

On file was Industrial Waste Permit No. 00010943 in September 1994. The permit is for a closed loop recycling system.

Also on file, were two Notices of Non-Compliance and one Notice of Violation (V186254). The first Notice of Non-Compliance was in February 1996 requiring an annual certification of the Leak Detection System for underground tanks. Results of tests regarding leak detection were on file, dated March 1996, showing both tanks as passing.

The Notice of Violation (V186254) was filed in February 1997 for failure to follow approved plans for the Industrial Waste facility and the need for a National Pollutant Discharge Elimination System permit. In May 1997, a second Notice of Non-Compliance was filed for failing to file plans and receive an Industrial Waste Permit, failure to properly install permitted Industrial Waste Facilities, and failure to file for a discharge permit with the State Regional Water Control Board.

The remainder of the file consisted of an Underground Storage Tank Facility compliance certificate (No. 21023), general correspondences, routine inspection reports and tank inspection reports. No items of an environmental concern were noted.

File No. 009315-041609 Hanson Spancrete Pacific Inc.

On file Industrial Waste Permit No. 000415981 for a closed loop system. Also on file, were routine inspections reports; no items of an environmental concern were noted.

File No. 009315-047866 Spancrete of California

According to a Department of Public Works representative, this is a stormwater file. A physical copy was not available for review.

5.2.6 Regional Water Quality Control Board

The Regional Water Quality Control Board reported File Nos. 419I000771, 108.1712 and 419I024305.

File No. 419I000771 Stormwater

This file contained annual monitoring reports submitted by the Building Materials Industry (BMI) Group. Hanson Spancrete Pacific Inc. was a member of BMI. Also on file, was a Stormwater Discharge Pollution Prevention & Monitoring Plan. No items of an environmental concern were noted.

File No. 108.1712 Well Investigation Program (WIP)

This file contained a No Further Action letter dated April 1, 1993 issued by the Regional Water Quality Control Board with respect to the WIP program as it pertains to the San Gabriel Valley Superfund Area. Also on file, was a joint U.S. EPA and Water Board NFA Letter dated 1996. The letter states that an assessment of the facility indicated 1) little or no solvent use; 2) the results of a staff inspection disclosed no solvent use; or 3) completed assessment work indicated no solvent contamination in the soil. Copies of these letters are included in *Appendix F*.

File No. 419I024305 Stormwater

This file contained annual monitoring reports submitted by the BMI group. Clark Pacific Irwindale was a member of BMI. Laboratory results associated with the annual monitoring reports were on file as well. Also on file, was a Stormwater Pollution Prevention Plan with an included update, several Notices of Intent for general permits to discharge stormwater, a Notice of Termination of stormwater discharge permits for the site and a site inspection report granting the termination in June, 2017. No items of environmental concern were noted.

5.3 Physical Setting Source(s)

5.3.1 *Topography*

The Baldwin Park Quadrangle topographic map, published by the United States Geological Survey (USGS), was reviewed for this ESA. According to the map, the elevation at the subject site is approximately 360 feet. The topography in the area of the site is generally flat.

5.3.2 *Soils/Geology*

The subject site is located within the San Gabriel Valley portion of the Los Angeles Basin. The shallow subsurface at the site consists of unconsolidated silty sands that are mapped by the California Division of Mines and Geology (Geologic Map of California, Los Angeles Sheet) as alluvium of Recent age.

5.3.3 *Hydrogeology*

The site is within the San Gabriel Valley Groundwater Basin. Monitoring wells in the area show that the depth to groundwater beneath the site is greater than 250 feet and that the direction of groundwater flow is to the south. The closest surface-water body to the site is the San Gabriel River, which flow southward approximately 1000 feet west of the site.

5.3.4 *Flood Zone Information*

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency, was performed. According to Panel Number 06037C1700F, the Property is located in a moderate to low flood zone. Moderate to low zones consist of areas with less than 1% chance of sheet flooding each year; areas that have less than a 1% chance of sheet flooding with an average depth of less than 1-foot; areas that have less than a 1% chance of stream flooding where the contributing drainage area is less than 1 square-mile; or areas protected from floods by levees. No base flood elevations or depths are shown within these zones.

5.3.5 *Oil and Gas Exploration*

The State of California Department of Conservation Division of Oil, Gas, and Geothermal Resources (DOG) records were reviewed.

According to the DOGGR - Online Mapping System, no abandoned or active wells are on the Property.

5.4 Historical Use Information on the Property

Development of the Property began in 1967 when the California Portland Cement Company, a manufacturer of cement, ready mix concrete, building and construction supplies, and concrete products began operations. Over the years, there have been several ownership changes; however, the operations have remained the same. Previous occupants include Spancrete of California, United Ready-Mix Concrete, Hanson Spancrete Pacific Inc., Heidelberg Cement Group and Clark Pacific.

5.4.1 *Sanborn Fire Insurance Maps*

The Sanborn Fire Insurance Maps did not offer coverage for the Property. (See *Appendix E*).

5.4.2 *City of Irwindale Building and Planning Departments*

LEC reviewed building permit records as part of an ESA completed in 2016. On file were permits dated 1968 for the installation of two underground fuel tanks and for the installation of a gas pump. Also on file, were permits dated December 1986 and November 2003 for the installation and subsequent removal of a 4,000 underground fuel tank.

No other permits of an environmental concern were noted

Building permits were not reviewed as part of this assessment. However, LEC inspected the property on July 17, 2018 and did not observe any structural changes or modifications to the building or Property.

5.4.3 *Aerial Photography*

Historical aerial photographs are reviewed in order to assist in identifying any past practices that may have negatively impacted the Property. Photographs from 1928 to 2016 were reviewed concerning this location.

1928 The Property is undeveloped. (See *Appendix G*.)

1938 No changes are noted from the previous photograph.

- 1948** No changes are noted from the previous photograph. (See *Appendix G.*)
- 1952** No changes are noted from the previous photograph.
- 1964** No changes are noted from the previous photograph. (See *Appendix G.*)
- 1970** Small buildings are present at the south end of the Property. The area north of the buildings is in use. The use appears consistent with current day operations. The northern portion of the Property remains undeveloped. See *Appendix G.*)
- 1977** No changes are noted from the previous photograph.
- 1981** The northern portion of the Property is now in use. The use appears consistent with former operations. (See *Appendix G*)
- 1989** No changes are noted from previous photograph.
- 1990** The Property is developed to present-day appearances. (See *Appendix G.*)
- 1994** No changes are noted from the previous photograph.
- 2002** No changes are noted from the previous photograph. (See *Appendix G.*)
- 2005** No changes are noted from the previous photograph.
- 2009** No changes are noted from the previous photograph.
- 2010** No changes are noted from the previous photograph.
- 2012** No changes are noted from the previous photograph.
- 2016** No changes are noted from the previous photograph. (See *Appendix G.*)

5.4.4 *Historical Topographic Maps*

Historical Topographic Maps did not provide pertinent additional information.

5.4.5 Additional Historical Record Sources

Additional historical records were deemed not to be necessary.

5.4.6 Prior Assessment Reports

LEC conducted a Phase I ESA of the Property in 2016. No further investigation was recommended.

5.5 Historical Use Information on Adjoining Properties

By review of the standard historical sources referenced above, the historical uses of the adjoining properties are summarized below:

North: Undeveloped land until sometime after 1952. By 1964, the San Gabriel Freeway (605) is present.

South: Undeveloped land until sometime after 1938. By 1948, the property is in use as a quarry.

East: Undeveloped land until sometime after 1964. By 1970, commercial use.

West: Undeveloped until sometime after 1970. By 1977, commercial use.

6. Site Reconnaissance

6.1 Methodology and Limiting Conditions

The Property was inspected by Myrna Rangel, Project Manager, and Travis Knight, Project Manager, on July 17, 2018. LEC was escorted by Mr. Andrew White, owner representative. The weather at the time of the site visit was sunny and clear.

6.2 General Site Setting

The Property encompasses approximately 24.5 acres; it is situated in a commercial and industrial area of Irwindale, California.

6.3 Exterior Observations

The periphery of the Property and the periphery of the structures were observed.

The parking lots at the south end of the Property appeared in fair condition. Minor surficial staining was noted. The staining appeared to be motor oil. No items of an environmental concern were noted.

The remaining cover is a combination of dirt, concrete and gravel. The portion of the Property were concrete was constructed is vacant, aside from some remaining concrete mixing equipment. Only minor staining was observed throughout. No items of an environmental concern were noted.

LEC noted a fenced area north of the office building that had signs indicating it was an oxygen canister storage area. No oxygen canisters were present in the area. No items of environmental concern were noted.

LEC noted a bermed concrete area with a grated trench running down the middle north of the former welding area. Mr. White indicated that the area was used to wash equipment. LEC noted that no cleaning equipment was present; however, the trench contained residual liquid. No items of environmental concern were noted.

LEC noted a bermed concrete storage area at the southeast corner of the Property with a Hazardous Material Waste Oil sign hanging from it. According to Mr. White, this feature was used to store hazardous waste oil. No staining was noted in the area surrounding the storage area. No items of environmental concern were noted.

6.3.1 Solid Waste Disposal

There was no indication of potentially hazardous material disposal noted during the site reconnaissance.

6.3.2 Surface Water Drainage

Topography at the Property is flat; surface drainage is via sheet flow to the City sewer system.

6.3.3 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.3.4 Wastewater

No other indication of wastewater treatment was observed.

6.3.5 Additional Site Observations

No additional relevant general site observations were observed during the site reconnaissance.

6.4 Interior Observations

The administrative offices consist of carpeted flooring and acoustic ceiling panels with fluorescent lighting. No items of an environmental concern were noted.

Quality Control

This area was used to conduct stress tests of the concrete and consists of concrete flooring and fluorescent lighting. No drains or sumps were observed. No items of an environmental concern were noted.

Maintenance Shop

The maintenance shop consists of concrete flooring and drop fluorescent lighting. Surficial staining was noted; the staining appeared to be heavy oil. No drains or sumps were observed. No items of an environmental concern were noted.

Welding Area

The welding area is a covered open space consisting of concrete flooring. Minor staining of the concrete floor was noted. No drains or sumps were observed. No items of an environmental concern were noted.

6.5 Potential Environmental Conditions

6.5.1 Hazardous Materials and Petroleum Products Used or Stored

No other evidence of the use of hazardous materials or wastes was observed on the Property.

6.5.1.1 Unidentified Containers and Drums

No other unidentified containers or drums were observed on the Property during the site reconnaissance.

6.5.1.2 Disposal Locations of Regulated/Hazardous Waste

A bermed concrete container in the southeast corner of the Property had been used as hazardous material waste oil storage. LEC noted that all hazardous waste had been removed and the storage was empty.

No other obvious indications of hazardous waste generation or storage were observed on the Property or were identified during interviews.

6.5.2 Evidence of Releases

No obvious indications of hazardous material or petroleum product releases, such as stained areas or stressed vegetation were observed during the site reconnaissance or reported during interviews.

6.5.3 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain polychlorinated biphenyls (PCBs) at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, electrical equipment can be classified into three categories:

- Less than 50 parts per million (ppm) of PCBs – *“Non-PCB” transformer*
- 50 ppm-500 ppm – *“PCB-Contaminated” electrical equipment*
- Greater than 500 ppm – *“PCB” transformer*

A pad-mounted transformer (#P5053437) is located in the welding area. No staining or discoloration was noted at the base of the transformer.

6.5.4 Landfills

No evidence of an on-site landfill was observed or reported during the site reconnaissance. A search of the State of California Solid Waste Information System did not indicate the presence of an historical landfill. In addition, the EDR report includes a review of listings concerning landfills; there is no indication that landfills have been located on or within on-half mile of the Property.

6.5.5 Pits, Ponds, Lagoons, Sumps, and Catch Basins

No evidence of on-site pits, ponds, lagoons was observed or reported during the site reconnaissance. No evidence of sumps or catch basins, other than used for storm water removal, was observed or reported during the site reconnaissance.

6.5.6 On-site Aboveground and Underground Storage Tanks

Two 1,000-gallon underground fuel tanks and one 4,000-gallon underground fuel tank were formerly onsite. The tanks were removed and NFA letters were issued. No other underground storage tanks were observed during the site reconnaissance or were reported during interviews.

6.5.7 Radiological Hazards

No radiological substances or equipment were observed during the site reconnaissance or were reported during interviews.

6.5.8 Drinking Water

The Property is supplied by the Valley County Water District. According to a water quality report dated 2015, the drinking water supplied to the Property is within state and federal standards, including lead and copper. Water sampling was not conducted at the Property to verify water quality.

6.5.9 Additional Hazard Observations

No additional hazards were observed on the Property.

6.5.10 Asbestos-Containing Building Materials

Although a survey for asbestos-containing building materials was not within the requested scope of work, this building was built during a period when asbestos-containing materials were commonly used in flooring, insulation, roofing, or many other building materials. Therefore, asbestos-containing building materials are most likely present at the site. The most likely materials to contain asbestos are floor tiles, “popcorn” ceilings, and insulation normally involved with heating, ventilation and air conditioning units and roofing materials. These observations do not represent a certified asbestos inspection, and laboratory analysis is required to positively identify any asbestos-containing materials.

6.5.11 Lead-Based Paint

A survey for lead-based paint (LBP) was not within the requested scope of work. Based on information provided by Forensic Analytical Specialties, Inc., which conducts LBP surveys, LBP was extensively used in buildings constructed by the 1920s. The paint industry voluntarily cut back on the amount of lead used in paint in 1955, but LBP has been commonly used up to the present throughout the construction industry, especially on frictions and impact surfaces (doors, windows, floors, etc.) and in bathrooms, kitchens, and exteriors for moisture resistance. The structure was constructed during the period when LBP was not extensively used; therefore, LBP is not likely to be present, but this cannot be verified without a certified LBP inspection.

6.5.12 Mold

LEC observed the accessible interior areas of the Property structure(s), for the presence of conspicuous mold or observed water intrusion or accumulation. LEC did not note conspicuous visual or olfactory indications of the presence of mold, nor did LEC observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.

This activity was not designed to discover all areas, which may be affected by mold growth on the Property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the Property. This evaluation did not include a review of pipe chases, HVAC systems or areas behind enclosed walls and ceilings.

6.5.13 Radon

The U.S. EPA and the U.S. Geological Survey have evaluated the radon potential in the United States and have developed a map to assist National, State, and local organizations to target their resources and to assist building code officials in deciding whether radon-resistant features are applicable in new construction. The map divides the country into three radon zones and is used to assign each of the counties in the United States to one of these zones based on radon potential. Each zone designation reflects the average short-term radon measurement that can be expected to be measured in a building without the implementation of radon control methods. The radon zone designation of the highest priority is Zone 1.

- Zone 1 - Highest Potential (greater than 4 pCi/L)

- Zone 2 - Moderate Potential (from 2 to 4 pCi/L)
- Zone 3 – Low Potential (less than 2 pCi/L)

A review of the EPA Map of Radon Zones places the Property in Zone 2, where average predicted radon levels are from 2 to 4 pCi/L.

6.5.14 EDR Vapor Encroachment Screen

A “Tier 1 (non-intrusive) Vapor Encroachment Screening (VES)” was completed in accordance with the methodology set forth in ASTM E2600-10 “*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*”. The purpose of the Tier 1 VES is to conduct an initial screen to identify, to the extent feasible, a potential vapor encroachment condition (VEC) in connection with the Property with respect to chemicals of concern that may migrate as vapors into existing or planned structures on the Property due to contaminated soil and or groundwater on the Property or within close proximity to the Property.

Based on the results of EDR’s E2600-10 Tier 1 Vapor Encroachment Screening, included as ***Appendix K***, vapor encroachment does not appear to be a concern at the Property.

7. Interviews

7.1 Interview with Owner

LEC interviewed Mr. Andrew White on July 17, 2018. Mr. White also completed a questionnaire supplied by LEC. Mr. White indicated he is not aware of any underground storage tanks on the property nor is he aware of any environmental conditions associated with the Property. Mr. White indicated that the Property is in a M2 (heavy industrial) zone and that he is not aware of any other AULs or deed restrictions on the property. Mr. White further indicated that hazardous materials, such as lubrication, hydraulic and motor oil, were used on the Property. See ***Appendix J*** for owner provided information.

7.2 Interview with Site Manager

There is no Site Manager.

7.3 Interview with Occupants

Not applicable; the Property is unoccupied.

7.4 Interview with Local Government Officials

See *Section 5.2* of this report.

7.5 Interview with Others

No other interviews were conducted by LEC.

8. Findings

Leymaster Environmental Consulting, LLC completed a Phase I ESA of the property located at 13131 Los Angeles Street, Irwindale, California.

Two 1,000-gallon fuel underground storage tanks and a 4,000-gallon fuel underground storage tank were formerly onsite.

The Property is listed in the HAZNET, LACHMS, NPDES, WDS, WIP, FINDS ECHO and CIWQS databases searched by EDR

The Property was also included in the SWEEPS, UST and HIST UST databases searched by EDR.

There are a few sites within 1/8 mile of the Property noted in the EDR Report.

9. Opinions

Two 1,000-gallon underground fuel tanks were installed in 1967 and removed in 1986. The tanks were removed under the oversight of the DPW. Analytical results from soil samples collected during tank removal activities indicated concentrations of TPH ranging from 46.5 ppm to 254.2 ppm. Depth to groundwater was reported at 150 to 175 feet below grade. The DPW issued a NFA Letter in December 1986. Following tank removal activities, a 4,000-gallon dual compartment fuel tank was installed in the former tank excavation area. This tank and the related dispensers and piping were removed in February 2004 under the oversight of the DPW. Soil samples collected beneath the tank and dispensers were below detection limits for TPH as gasoline, TPH as diesel, VOCS, fuel oxygenates and organic lead. Soil samples were not collected along the piping run because the distance was less than 20 feet. The DPW issued a NFA letter in March 2007. Based on this, the former tanks do not represent an environmental concern.

The Property is listed in the HAZNET, LACHMS, NPDES, WDS, WIP, FINDS ECHO and CIWQS databases searched by EDR. In each case, no substantive information was provided that would indicate a significant environmental threat to the Property.

The Property was also included in the SWEEPS, UST and HIST UST databases searched by EDR. Inclusion in these databases is resulting from the former underground storage tanks discussed above and does not represent an environmental concern.

No environmental concerns exist as a result of the sites listed in the EDR Report and supplemental agency review attachments of this report due to either the distance from the Property, the absence of violations, or responsible parties have been identified for the environmental concern.

10. Conclusions

Leymaster Environmental Consulting, LLC has performed a Phase I ESA of the property located at 13131 Los Angeles Street, Irwindale, California in conformance with the scope of limitations of American Society for Testing and Materials (ASTM), Standard Practice for Assessment Process, E 1527-13 and EPA Final All Appropriate Inquiries (AAI) standard practices. Any exceptions to, or deletions from this practice are described in *Section 2.3* of this report.

This Phase I ESA revealed no evidence of environmental conditions associated with the Property. No further investigation is recommended at this time.

11. Deviations

This Phase I Environmental Site Assessment substantially complies with the scope of services and ASTM E 1527-13 and EPA AAI, as amended, except for exceptions and/or limiting conditions discussed in *Section 2.4*.

12. Additional Services

No additional services, outside the scope of this Phase I ESA, were contracted for between the user and LEC.

14. Signature of Environmental Professionals

I declare that to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mark Leymaster
Environmental Professional

Travis Knight
Staff Engineer

15. Qualifications of Environmental Professionals

Mark Leymaster

Mr. Leymaster is the President of Leymaster Environmental Consulting, LLC. Mr. Leymaster is a Registered Professional Engineer in the State of California (M23031) and is also a Registered Environmental Assessor II in the State of California (20057). Mr. Leymaster has over 20 years of experience as an environmental consultant.

Mr. Leymaster's responsibilities have included Phase I property transfer assessments, compliance audits, permitting, soil and groundwater investigations, remediation projects, litigation support, expert testimony, overseeing manufacturing facility closures, and the closure of Transport, Storage, and Disposal facilities.

His projects have included defining the lateral and vertical extent of soil and groundwater contamination of sites for both organics and inorganics. Agency sign-offs for both groundwater and soil remediation sites have been received for systems designed, installed, and operated by Mr. Leymaster. He has evaluated many Brownfield sites for potential buyers and has overseen the successful property transaction, remediation installation and development of the properties. Mr. Leymaster has conducted approximately 200 Phase I environmental site assessments at a variety of commercial, industrial, and residential properties including: defense manufactures, plating facilities, printing shops, salvage yards, foundries, dry cleaners, apartment complexes, office buildings, shopping centers and automotive maintenance facilities. He has performed approximately 150 subsurface soil and groundwater investigations. He has evaluated and completed remediation of over 30 facilities contaminated with metals, chlorinated solvents, volatile organic compounds and acids.

Travis Knight

Mr. Knight is a Staff Engineer at Leymaster Environmental Consulting, LLC. Mr. Knight has a Bachelor of Science degree from the University of California San Diego in the study of Environmental Engineering. Mr. Knight is a Registered Engineer in Training with the State of California (163532).

Mr. Knight's experience includes soil testing and scientific research for the purpose of soil remediation.

16. Appendices

APPENDIX A

LOCAL AREA MAP

Leymaster Environmental Consulting, LLC <hr/> 5500 E. Atherton St., Suite 210 Long Beach, CA 90815	Local Area Map

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 05/13/2018 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/30/2018 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 6 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 7 SWEEPS UST sites within approximately 0.25 miles of the target property.

FINDS:
Registry ID: 110070092601

Environmental Interest/Information System
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

SAN GABRIEL VALLEY (AREA 2) (Continued)

1000114961

Scoring: 4
NPL Status: Currently on the Final NPL
Substance ID: U228
Substance: TRICHLOROETHYLENE (TCE)
CAS #: 79-01-6
Pathway: GROUND WATER PATHWAY
Scoring: 2

Summary Details:

Conditions at listing September 1983): San Gabriel Valley Area 2) is a ground water plume that parallels the San Gabriel River to the west in the San Gabriel ground water basin in the Baldwin Park area of Los Angeles County, California. The plume is about 7.5 miles long and 1.5 miles wide. Ground water is contaminated with trichloroethylene (TCE), perchloroethylene (PCE), and carbon tetrachloride, according to analyses by State agencies and local water companies. Many public wells in the area exceed the EPA Suggested No Adverse Response Levels (SNARL) for TCE and PCE. Approximately 100,000 people are affected. Cities and public water companies in the area have tested to ensure that their water supplies contain less than 5 parts per billion (ppb) of TCE, a level considered safe for human consumption. When alternative methods of reducing the TCE level below 5 ppb are not effective, wells are removed from service. Status June 1984): A supplemental sampling program of contaminated wells will begin soon to get a snapshot view of the degree of contamination. The State Department of Health Services and EPA are preparing to initiate a remedial investigation/ feasibility study to determine the aerial and vertical extent of contamination and to develop alternatives for treatment and management of the problem. EPA continues its investigation to identify sources of the contamination. This site, along with the three other San Gabriel Valley sites, was added to the NPL in May 1984 because it involves a serious problem that required taking immediate remedial action.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

HAZARDOUS AIR POLLUTANT MAJOR

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

	Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 01/03/2018	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 02/14/2018	Telephone: 860-424-3375
Date Made Active in Reports: 03/22/2018	Last EDR Contact: 05/18/2018
Number of Days to Update: 36	Next Scheduled EDR Contact: 08/27/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Southwest Map:	5630799 EL MONTE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK[®] - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

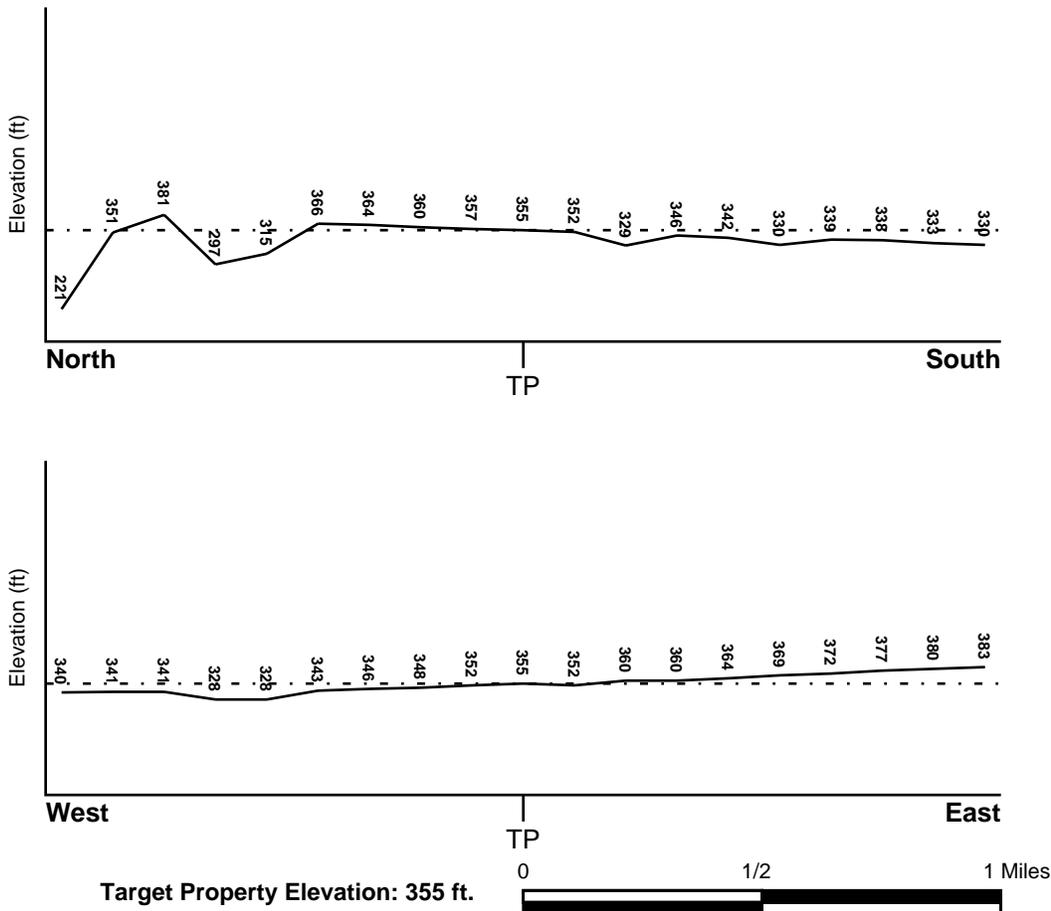

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1700F	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1675F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
BALDWIN PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
6	1/2 - 1 Mile ESE	Not Reported
1G	1/2 - 1 Mile ESE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Surficial Soil Types: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sand
 silty clay

Deeper Soil Types: stratified
 clay loam
 silty clay loam
 gravelly - sandy loam
 coarse sand
 sand
 weathered bedrock
 very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Water System Information:

Prime Station Code:	01S/11W-02H02 S	User ID:	4TH
FRDS Number:	1910090005	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340600.0 1180000.0	Precision:	Undefined
Source Name:	MONROVIA WELL 05		
System Number:	1910090		
System Name:	MONROVIA-CITY, WATER DEPT.		
Organization That Operates System:	415 SOUTH IVY AVENUE MONROVIA, CA 91016		
Pop Served:	37545	Connections:	8359
Area Served:	MONROVIA		
Sample Collected:	03-JAN-12	Findings:	3.8 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	07-FEB-12	Findings:	4.9 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	06-MAR-12	Findings:	5.6 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03-APR-12	Findings:	6.1 MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	03-APR-12	Findings:	370. US
Chemical:	SPECIFIC CONDUCTANCE		
Sample Collected:	03-APR-12	Findings:	7.8
Chemical:	PH, LABORATORY		
Sample Collected:	03-APR-12	Findings:	130. MG/L
Chemical:	ALKALINITY (TOTAL) AS CaCO3		
Sample Collected:	03-APR-12	Findings:	160. MG/L
Chemical:	BICARBONATE ALKALINITY		
Sample Collected:	03-APR-12	Findings:	160. MG/L
Chemical:	HARDNESS (TOTAL) AS CaCO3		
Sample Collected:	03-APR-12	Findings:	47. MG/L
Chemical:	CALCIUM

Water System Information:

Prime Station Code:	01S/11W-02H01 S	User ID:	4TH
FRDS Number:	1910090004	County:	Los Angeles
District Number:	07	Station Type:	WELL/AMBNT/MUN/INTAKE/SUPPLY
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340600.0 1180000.0	Precision:	Undefined
Source Name:	MONROVIA WELL 04		
System Number:	1910090		
System Name:	MONROVIA-CITY, WATER DEPT.		
Organization That Operates System:	415 SOUTH IVY AVENUE MONROVIA, CA 91016		
Pop Served:	37545	Connections:	8359
Area Served:	MONROVIA		
Sample Collected:	01-OCT-13	Findings:	7. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	11-OCT-13	Findings:	7.1 MG/L
Chemical:	NITRATE (AS NO3)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2010. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Leymaster Env. Consulting were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 1892-41B2-82B7

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Leymaster Env. Consulting (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Dear Mr. Knight:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the site/facility referenced above.

We would also like to inform you about EnviroStor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

If you have any questions or would like further information regarding your request, please contact me at (818) 717-6521.

Sincerely,

Robert Hardison/aa
Regional Records Coordinator

Dear Mr./Ms. Knight:

The Department of Toxic Substances Control has received your letter to review records under the Public Records Act.

After a thorough review of our files we have found that, no such records exist at this office pertaining to the site/facility referenced above.

We would like to inform you about EnviroStor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: <http://www.envirostor.dtsc.ca.gov/public>. Also, a computer is available at each DTSC Regional File Room Office for use by community members to view EnviroStor.

If you have any questions, would like further information regarding your request, please contact our Regional Records Coordinator at (714) 484-5337.

Sincerely,

Julie Johnson

Attention: Non-compliance could result in re-inspection fees, permit revocation, and/or administrative/civil/criminal penalties. A re-inspection may occur at any time to verify compliance. Any time granted for correction of the violation(s) does not preclude any enforcement action by this Department or other agencies.

It is improper and illegal for any County officer, employee or inspector to solicit bribes, gifts, or gratuities in connection with performing their official duties. Improper solicitations include requests for anything of value such as cash, discounts, free services, paid travel or entertainment, or tangible items such as food or beverages. Any attempt by a County employee to solicit bribes, gifts or gratuities for any reason should be reported immediately to either the County manager responsible for supervising the employee or the Fraud hotline at (800) 544-6861 or www.lacountyfraud.org. Attention: Non-compliance could result in re-inspection fees, permit revocation, and/or administrative/civil/criminal penalties. A re-inspection may occur at any time to verify compliance. Any time granted for correction of the violation(s) does not preclude any enforcement action by this Department or other agencies.

It is improper and illegal for any County officer, employee or inspector to solicit bribes, gifts, or gratuities in connection with performing their official duties. Improper solicitations include requests for anything of value such as cash, discounts, free services, paid travel or entertainment, or tangible items such as food or beverages. Any attempt by a County employee to solicit bribes, gifts or gratuities for any reason should be reported immediately to either the County manager responsible for supervising the employee or the Fraud hotline at (800) 544-6861 or www.lacountyfraud.org. YOU MAY REMAIN ANONYMOUS.

INSPECTOR FIELD NOTES

Inspection Notes
PZ. Paolo Zenarosa
Date: 8/22/16

I. OPENING CONFERENCE

Nature of business: CLARK PACIFIC. The facility is a concrete products company that specializes in cement module molding. The facility has numerous large molds for cement to pour and serve as mass production of cement modules for large construction projects. The walkthrough was conducted by Ernie Figueroa after Ken Jarman provided consent for the inspection.

Consent to conduct the inspection was granted by: Ken Jarman, Plant Manager.

Additional individuals involved in the inspection (if applicable): Ernie Figueroa, Maintenance Lead Staff

Program Element(s): The facility was verified to be a:
Hazardous Waste Generator with 140 employees corresponding to PE 1004;
Hazardous Materials Handler with volume thresholds corresponding to PE 3003.

II. WALKTHROUGH

Process(es):

HazMat Observed On Site:

OUT = Out of Compliance COS = Corrected on Site RPT = Repeat Violation

- HM/volume/hazard/location
- Oxygen / 1800 cuft / oxidizer / gas storage area
- Acetylene / 1000 cuft / flammable / gas storage area
- Waste oil / 400 gal tank / toxic / HW accumulation area
- New oil / 600 gal / toxic / Oil storage area
- Pozzoloth / 400 gal / toxic / batch plant
- Glenium / 1500 gal / toxic / batch plant
- All other HM reported in CERS have been verified accurate on site.

HazWaste Observed On Site:

- Oil change of equipment and vehicles > generates HW used oil > stored in a 400 gal tank > disposal docs reviewed ok.
- Spill control and solvent removal > generates HW solids, rags and spent absorbent > stored in 55 gal container > disposal docs ok.
- Parts wash > generates spent parts wash > stored in a 30 gal recirculating tank > disposal docs reviewed ok.
- Coolant change > generates HW used antifreeze > stored in a 55 gal container > disposal docs ok.
- Water washing of equipment and maintenance area > generates waste water > stored in sump and then passed through clarifier > reviewed non HW docs for sludge removal from clarifier.

III. DOCUMENTS

HazMat - CERS Review:

- Annual Recertification -ok
- Facility Information - ok
- Emergency Contact Information verified and accurate -ok
- Reported inventory matches observed quantities -ok
- Site Map with all required content -nok, missing info, NOV.
- Emergency Response and Contingency Plan - nok, missing info, NOV.
- Employee Training Plans -ok

HazWaste

- Active EPA ID - ok
- CUPA Permit - ok
- Hazardous Waste Manifests -
 - o #015377092JJK, 6/9/16 by Industrial Waste Utilization Inc, waste solids
 - o #015377087, 6/6/16 by Stress Less Express LLC, used oil 200 gal
- HW Container Weekly Inspection Log (if any) - nok, NOV.

IV. CLOSING CONFERENCE

- The inspection report and inspection findings were explained to the operator/owner.
- The owner/operator was advised of proper hazardous waste management, hazardous materials handling, record-keeping, permit payment, and good business practices.
- The owner/operator was advised to update, review and submit any and all information missing in the California Environmental Reporting System (CERS) online system.
- The owner/operator was advised to report to the CUPA any and all incidents of hazardous waste, hazardous materials and petroleum products that had spilled into off-site areas from the facility.
- The owner/operator was advised to contact the CUPA for any and all future questions regarding hazardous materials and if any change were to be made to their manufacturing processes, ownership changes and/or changes to SPCC Plans.

BUSINESS PLAN ANNUAL RENEWAL CERTIFICATION

Hazardous Materials Inventory Statement (HMIS)

I certify that the attached HMIS reflects the handling of hazardous materials for the reporting year in accordance with the following conditions: (Please check all that apply).

- Delete:** Write "delete" on the HMIS next to any previously disclosed hazardous materials that are no longer used.
- Revise:** Write the correct amounts, locations, or container type on the HMIS to reflect the accuracy of any previously reported hazardous materials.
- EPCRA Compliance:** Fill in the EPCRA field with your signature on the HMIS for any hazardous material type and quantity identified on 40 CFR Part 355, Appendix A—The List of Extremely Hazardous Substances and Their Threshold Planning Quantities.
- Add:** Complete one **Hazardous Materials Inventory—Chemical Description Form** to add each hazardous materials that you have not previously disclosed. Submit one form per chemical.
- No Change:** **Hazardous Materials Inventory Statement (HMIS)** is accurate and complete.

Consolidated Contingency Plan (CCP)

An initial submittal of the CCP is required when you start handling hazardous materials. At least once every 3 years after the initial submittal, the CCP needs to be reviewed and certified that the file with your agency is accurate and current in accordance with the following conditions:

- If the Owner/Operator page indicates "CCP Certification required"** complete and submit a new CCP.
- Modification:** Significant changes in facility personnel or operations required a revision of the CCP. Complete and submit changes of your CCP with this form. Indicate changes by crossing out old information, and writing in the correct information.
- Lost:** Complete and submit any parts of your CCP that were lost or damaged.
- No Change:** There have not been any significant changes in the facility's personnel and operations that require a revision to the current CCP.

Received
 DEC 22 2010

Cal-ARP Program

I reviewed the threshold quantities in Section 2770.5 of Title 19 of the California Code of Regulations and certify that any regulated substance on the attached HMIS accords with the following registration requirement:

- Add:** Complete the **Cal-ARP Program Regulated Substance Registration** form only if the regulated substance is at or above the threshold quantity (TQ). Submit one form per chemical.
- No Change:** The previously submitted registration for regulated substance(s) is accurate.

HHMD Data Ops

ANNUAL CERTIFICATION

I certify that the information submitted herein is complete and accurate. Also, no hazardous materials subject to the inventory requirements of Chapter 6.95 of the Health and Safety Code are being handled that are not listed on the most recently submitted annual inventory form.

Field Notes

LIST ORDER OF INSPECTION AS FOLLOWS: I. OPENING CONFERENCE II. WALK THROUGH III. DOCUMENTS
IV. CLOSING CONFERENCE V. VIOLATIONS

On January 28, 2010 a routine hazardous materials waste inspection was conducted at 13131 Los Angeles St in the City of Trumbull. The operator Dwight Edwards granted consent for the inspection. Facility, EPA # is CAL 000221108. Facility main line of work is pre cast cement for building parking structures. Facility manufactures Double T's Beams & columns.

Equipment maintenance is main source of hazardous waste
steam cleaning pit → recycle water through filters → sludge → HW

Rug Service 1 X 55 gallon drum → waste removed by K-Vac
7-17-09 (352) Rugs 1000 lbs 003957916JJK

3 Cement Cutters, 4 Forklifts, 7 Cement mixers → oil changes
1 X 200 AST used oil → waste removed by Action
11-10-09 200 gallons (221) used oil 000824459GBF
1-27-10 200 gallons (221) used oil 000823929GBF

2 Rebar benders → hydraulic oil → never been changed
Observed CCP, Training Records, Permit, MSDS

Adding Natural Gas cylinders to inventory & deleting diesel & Gasoline
Advised Mr. Edwards to have Natural Gas cylinders certified
due to refilling by his employees.

MET WITH DWIGHT EDWARDS AND OBTAINED HIS CONSENT TO INSPECT AFTER EXPLAINING TO HIM THE NATURE OF THIS INSPECTION.
GENERAL HOUSEKEEPING: FAIR TO THIS KIND OF OPERATION.

THIS IS A CONCRETE MIXING AND PRE-CASTING FACILITY.

ADDITIVES USED IN MIXING CONCRETE:

- PL 90 (Sodium Dodecylbenzene Sulfonate) 1X 15,000 GAL ^{PLASTIC} 8/6 Tank
- POLAR SET (Calcium Nitrate + DEG) only occasionally in 55 GAL DR
- NRDA 79 (Sodium D-Methyl-Tetrahydroamine) 1X 15,000 GAL 8/6 Tank
- MBL-82 (TRIETHANOLAMINE) NOT IN USE.
- DCI-3 (Corrosion Inhibitor) 1X 15,000 GAL 8/6 Tank NOT IN USE

Gasoline in 1X 2000 UST

Diesel in 1X 2000 UST

FRESH LIME OIL in 6X 55 GAL DR.

KEROSENE in 1X 55 GAL DR. For Heating

WASP OIL in 1X 200 GAL 8/6 Tank LABEL ONLY

USED OIL FILTER in 1X 55 GAL DR.

1X Steam cleaning Unit

WASP WAGON IS REUSED. AFTER FILTERING
STORAGE FROM OIL IN FILTER → USED FOR (HW) STORAGE.

1X PARTICLE CLEANER

Acquiesce or Solvent?

Violations: The conditions or practices checked below represent a violation of the referenced section of Title 22, California Code of Regulations (22 CCR, Div 4.5, Ch 10, Sec 66260.1 et seq), and/or Health & Safety Code Chapter 6.5 (H&S, Div 20, Ch 6.5, Sec 25100 et seq) for which there are civil and criminal penalties. Time granted for correction of violations does not preclude any enforcement action by this Department or other agencies. You are directed to correct the violations within the times specified. Failure to do so will be considered an additional violation.

HAZARDOUS WASTE DETERMINATION

Correction Date 1/1

- 01 Provide a hazardous waste determination for (CCR 66262.11)
- _____
- _____

DISPOSAL

Correction Date 03/15/94

Discontinue the illegal disposal of hazardous waste and/or extremely hazardous waste to an unauthorized location (H&S 25189.5):

- 02 trash/dumpster/ground;
- 03 storm drain;
- 04 sewer/septic system with a permit;
- 05 unpermitted facility;
- 06 Discontinue the disposal of hazardous materials containers which are not legally empty (CCR 66261.7)
- WASTE FROM SITE CLEANUP

EPA NUMBER/PERMITS

Correction Date 1/1

Obtain the following from the Cal-EPA:

- 07 EPA Identification Number (contact Cal-EPA, 916-324-1781, for ID number) (CCR 66262.12);
- 08 on-site waste treatment/disposal permit for (CCR 66270.1)
- _____
- 09 extremely hazardous waste permit for handling and disposal of (CCR 67430.1)

STORAGE AND MANAGEMENT OF CONTAINERS

Correction Date 1/1

Discontinue the on-site accumulation of hazardous waste:

- 10 longer than 90 days without an extension from DTSC (CCR 66262.34(c));
- 11 longer than 90 days after 100 kg has been accumulated (CCR 66262.34(b));
- 12 longer than 1 year or 90 days after 55 gallons has been accumulated at satellite storage.
- Label the waste container with the following:
- 22 the words, "HAZARDOUS WASTE" (CCR 66262.34(f));
- 14 description of contents / hazardous property of waste / generator name and address (CCR 66262.34(f));
- 13 accumulation start date (CCR 66262.34(f)).
- Provide hazardous waste containers which are:
- 15 in good condition (CCR 66265.171);
- 16 compatible with waste contents (CCR 66265.172);
- 17 closed/sealed during storage (CCR 66265.173);
- 18 handled/stored/segregated to minimize waste release/reaction (CCR 66265.177(c));
- 19 inspected at least weekly (CCR 66265.174).
- 25 Label hazardous materials properly within 10 days or handle as hazardous waste (CCR 66261.2(f)(1)).
- 26 Store hazardous materials properly within 96 hours or handle as hazardous waste (CCR 66261.2(f)(2)).
- 20 Properly manage used oil filters (CCR 66266.130).
- 21 Properly manage spent lead-acid storage batteries (CCR 66266.81).

TANK REGULATIONS

Correction Date 1/1

- 23 Discontinue storing incompatibles in the same tank (CCR 66265.199).
- 24 Inspect tank and tank equipment daily and document in the operating record of the facility (CCR 66265.195).

- 27 Obtain a storage permit for tanks greater than 5,000 gallons of hazardous waste (CCR 66262.34(d)).
- 28 Provide proper secondary containment for hazardous waste tank systems (CCR 66265.193).
- 29 Provide a written assessment for tank system (CCR 66262.192).

RECORDKEEPING

Correction Date / /

- 30 Keep waste analysis/test records for at least three years (CCR 66262.40(e)).
- 31 Send Biennial Report to DTSC (CCR 66262.41).
- 32 Retain copies of biennial and exception reports for at least three years (CCR 66262.40(b)).

TRAINING

Correction Date / /

- 33 Provide a training program (CCR 66265.16).
- 34 Train and supervise personnel within six months of hire date and retrain as needed (CCR 66265.16(b)).
- 36 Keep training records on site (CCR 66265.16(d)).
- 37 Maintain training records until closure of facility or for at least three years (for former employees) (CCR 66265.16(e)).

CONTINGENCY PLAN/BUSINESS PLAN

Correction Date / /

- 38 Submit a contingency/business plan (CCR 66265.53(b)).
- 39 Complete contingency/business plan (CCR 66265.52).
- 40 Maintain copy of plan on site (CCR 66265.53).
- 41 Amend and update plan as necessary (CCR 66265.54).
- 42 Assign Emergency Coordinator to facility (CCR 66265.55).

PREPAREDNESS AND PREVENTION

Correction Date / /

- 43 Maintain facility to minimize possibility of fire or release of hazardous waste or constituents (CCR 66265.31).
- 44 Provide an internal communications or alarm system (CCR 66265.32(a)).
- 45 Provide a device capable of calling outside emergency help (CCR 66265.32).
- 46 Provide access to communication/alarm system during waste handling (CCR 66265.34).
- 47 Provide fire/spill control or decontamination system (CCR 66265.32(e)).
- 48 Test and maintain emergency equipment (CCR 66265.33).
- 49 Maintain required aisle space (CCR 66265.35).

MANIFEST/RECEIPTS

Correction Date / /

- 50 Discontinue shipping hazardous waste without a manifest (CCR 66262.42).
- 57 Maintain manifest copy for three years from shipment (CCR 66262.40).
- 51 Maintain completed modified manifest/receipt(s) on site for at least three years (CCR 66263.42).
- 52 Maintain used oil manifest/receipt(s) on site for at least three years (H&S 25250.8).
- 53 Provide manifest copies to DTSC within 30 days (CCR 66262.23).
- 54 Complete all applicable sections of the manifest (CCR 66262.23).
- 55 Determine status of waste when TSD facility manifest copy is not received within 30 days (CCR 66262.42).
- 56 Send Exception Report to DTSC within 45 days (CCR 66262.42).
- 58 Provide proper documentation for excluded recyclable materials (H&S 25143.10).

TRANSPORT

Correction Date / /

- 59 Discontinue shipping hazardous waste by transporters lacking an EPA ID No. (CCR 66262.12).
- 60 Discontinue shipping hazardous waste to TSD facilities lacking an EPA ID No. (CCR 66262.12).

OTHER

Correction Date 03/15/94

- 61 Provide Hazardous Waste Management Performance Plan and Report for review (H&S 25244.21).
- 62 Provide a copy of LDR notice/certification for each shipment of restricted hazardous waste (CCR 66268.7).
- 63 Provide a corrective action plan for unauthorized releases of hazardous waste or constituents (H&S 25187).
- 64 Legally remove hazardous waste/contamination before the closure of the facility (CCR 66265.11).

Provide a System for the LEGAL disposal of waste from the SPAN CRATE

Dear Mr. Edwards:

**HAZARDOUS MATERIALS UNDERGROUND STORAGE
CLOSURE CERTIFICATION
CLOSURE APPLICATION NO. 397470
FACILITY LOCATED AT 13131 EAST LOS ANGELES STREET, IRWINDALE (3S)**

This office has reviewed the final closure report dated February 25, 2004, required as a part of the subject closure permit. Based on the information submitted, we find that all closure requirements have been completed. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is our position that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at this facility. Nor does it relieve you of the responsibility to cleanup existing, additional, or previously unidentified conditions at the facility, which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

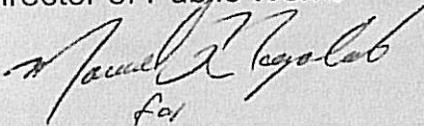

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings, or site usage.

Mr. Dwight Edwards
March 1, 2007

Gentlemen:

HAZARDOUS MATERIALS UNDERGROUND STORAGE
CLOSURE PERMIT NO. 2147B
FACILITY AT: 13131 Los Angeles St.

This office has reviewed the soil/groundwater assessment report submitted on December 12, 1986 as required as part of the subject closure procedure. Based on the information submitted, the following action is required:

- The closure is final and no further action is required.
- The soils removed during the tank excavation are unrestricted and may be used as backfill material. The closure is final and no further action is required.
- The soils are not suitable as fill material and must be manifested and transported to a hazardous waste disposal facility as required by California Health and Safety Code, Division 20, Chapter 6.2, unless evidence is presented indicating that disposal is proper at a less restricted facility. Copies of all completed manifests shall be submitted to this office indicating legal disposal.
- The permanent closure of the tanks(s) in place shall comply with requirements set by the local Fire Department. Verification must be submitted to this office indicating proper closure and completion of all work.

If you have any questions concerning this matter, please contact Kelsey Schwartz at (213) 226- 4430.

Very truly yours,

T. A. TIDEMANSON

SITE INSPECTION - WELL INVESTIGATION PROGRAM (File No. 108.1712)

On March 23, 1993, your facility was inspected by staff of this Regional Board. The inspection mainly focused on present and past methods for handling chemicals and wastes at the facility.

Based on the information presented and staff's observation, no further action on your part is required at this time with respect to the Well Investigation Program. You are required to notify this Board of any change in your operation, including the storage and handling of chemicals, or the processing and disposal of wastes. It should be noted that this letter in no way releases you from any chemical and/or waste handling requirements of this or any other agency.

Per your request, enclosed is a copy of "Waste Discharge Permit Application Package and Instructions." This will show you how to apply a permit in order to legally infiltrate the collected rinse water and surface runoff through the percolation pond into the groundwater. If you have any questions regarding this issue, please call Frank Goldman at (213) 266-7584.

Please contact Wayne V. Chiou at (213) 266-7662 if you have any other questions.

RE: San Gabriel Valley Superfund Areas
U.S. EPA and LARWQCB Notification of No Further Action

For property located at:

UNITED SPANCRETE PRODUCTS
13131 LOS ANGELES ST.
IRWINDALE, CA 91706-
File Number 108.1712

Dear Owner/Operator,

The California Regional Water Quality Control Board, Los Angeles Region ("Regional Board") staff has conducted an assessment of your facility to determine the extent of solvent usage and to assess past and current chemical handling, storage and disposal practices. Your company is among those in the San Gabriel Valley which have received the Regional Board's "No Further Action" letters based on one or more of the following categories: 1) information provided in your pre-inspection questionnaire disclosed little or no solvent use; 2) the results of a staff inspection disclosed no solvent use; or 3) completed assessment work indicated no solvent contamination in the soil.

The purpose of this letter is to inform you that, based on the information provided to U.S. EPA by the Regional Board to date, you will not be asked by the U.S. EPA or the Regional Board to participate in regional groundwater cleanup projects currently planned for San Gabriel Valley. Your company is no longer part of the U.S. EPA Superfund process, and the Regional Board and the U.S. EPA plan no further action concerning your facility.

You may be contacted by those potentially responsible parties ("PRPs") that have been asked to participate in the groundwater cleanup efforts. In the event you are contacted by PRPs, please feel free to contact the appropriate Regional Board or U.S. EPA staff for additional information or assistance. The telephone numbers of Regional Board and U.S. EPA staff are provided on the enclosed contact list.

Sincerely,

Keith A. Takata

I. OPENING CONFERENCE

Nature of business: CLARK PACIFIC. The facility is a concrete products company that specializes in cement module molding. The facility has numerous large molds for cement to pour and serve as mass production of cement modules for large construction projects. The walkthrough was conducted by Ernie Figueroa after Ken Jarman provided consent for the inspection.

Consent to conduct the inspection was granted by: Ken Jarman, Plant Manager.

Additional individuals involved in the inspection (if applicable): Ernie Figueroa, Maintenance Lead Staff

Program Element(s): The facility was verified to be a:
Hazardous Waste Generator with 140 employees corresponding to PE 1004;
Hazardous Materials Handler with volume thresholds corresponding to PE 3003.

Cc: WB-RB4-PublicRecords <RB4-PublicRecords.RB4-PublicRecords@waterboards.ca.gov>, "Flores, Lucinda@Waterboards" <Lucinda.Flores@waterboards.ca.gov>

****Please submit future file review requests to the LARWQCB via e-mail to RB4-publicrecords@waterboards.ca.gov****

Thank you for your request to review Regional Board records on:

- [13131 Los Angeles Street, Irwindale, CA 91706](#)

[Records found for 13131 Los Angeles Street, Irwindale.](#)

There are documents after April, 2016 for WDID# 4 19I024305 ([13131 Los Angeles Street Irwindale CA 91706](#), Terminated). You may find these documents in our database system, SMARTS:

Stormwater Compliance Unit is implementing a paperless office system to reduce paper use.

The file could be downloaded from the SMARTS system. Accessing documents via SMARTS:

1. Navigate to: <https://smarts.waterboards.ca.gov/>
2. Click on "View SW Data" under Public Access
3. Click on "Search for Owners/Operators or Facilities/Sites"
4. Enter information provided (WDID Number) and click "Search".
5. From the search results menu, "NOI Form", "View Attachments" and "Receipt Letter" accesses documents on record.

The Regional Board has determined that it has documents that are responsive to your request and disclosable.

To ensure that the records you wish to examine are available in the Regional Board's File Review Room and that you have sufficient desk space to review them, [please call Ms. Cindy Flores at 213.576.6633 to request files and schedule an appointment.](#) The File Review Room is found on the second floor of the Regional Board's Office, located at [320 West Fourth Street](#) in Los Angeles, California.

You may make a copy of any document provided by utilizing one of the self-serve photocopying machines in the File Review Room. For your convenience, the Regional Board provides coin-operated copiers for public use. Copies can be made at a cost of \$0.15 per

page. Please be advised, however, that the Regional Board cannot make any change. Therefore, please bring plenty of coins and small bills if you intend on using the copy machines. Alternatively, you can bring a photocopying machine or arrange to have a bonded photocopying service come to the Regional Board and make the desired copies. In that the items being provided are official records, the Regional Board requests that appropriate care be taken when reviewing documents and making copies.

Subject: Public Records Request

Hello,

Do you have any records for the property at [13131 Los Angeles St](#) in Irwindale, CA?

We have already acquired public records on this property in April, 2016, so all we would need is any new information of the property since then.

Thank you

--

Travis Knight

APPENDIX I

**SPECIAL CONTRACTURAL CONDITIONS BETWEEN USER AND
ENVIRONMENTAL PROFESSIONAL**

LEYMASTER ENVIRONMENTAL CONSULTING, LLC

5500 East Atherton Street, Suite 210
Long Beach, California 90815
Phone (562) 799- 9866
Fax (562) 799-1963

The following is the scope of work involved with a Phase I Environmental Assessment following ASTM E 1527-13 practices:

1. Prepare a history of the subject site development and land use based on data collected from local agency records, aerial photos, on-site inspection and individuals as appropriate.
2. Review pertinent records of local Building, Fire, Environmental and other departments that may have information regarding, or an official interest in, the site or its improvements.
3. Investigate the site and nearby properties with regard to information included in the EPA National Priorities List and CERCLIS List, the Department of Toxic Substances Control State Superfund List and CALSITES List, and listings of sites of environmental concern maintained by other regulatory agencies.
4. Review applicable records and files of the Department of Toxic Substances Control, Regional Water Quality Control Board, Integrated Waste Management Board, and other regulatory agencies for the subject site and for nearby properties that in the opinion of the assessor may affect the subject site.
5. Analyze available recent and historical aerial photographs to identify or verify past uses, developments, improvements or modifications made to the site, including ponds, tanks, oil wells, sumps, or disposal areas on the site or adjacent properties.
6. Inspect the site and interiors of all buildings for potential environmental concerns resulting from the handling, use, storage, and disposal of hazardous chemicals, underground tanks, clarifiers, and liquid-filled electrical devices.
7. Identify the present use of all immediately adjacent properties and determine the current status of any environmental conditions or investigations of these properties that could impact the site.
8. Conduct a search of appropriate records to determine the existence, if any, of environmental liens and, activity and use limitations affecting the subject site.
9. Review Chain-of-Title reports for potential environmental concerns that may affect the subject site. A title report for the property must be provided or will be obtained by LEC at an additional cost.
10. A written report describing the subject site, improvements and adjacent properties and discussing all findings and any analytical work that may have been authorized will be prepared.

11. If evidence of the presence or suspected presence of an area of environmental concern is found, the evidence and location will be described. If no evidence of the presence or suspected presence of an area of environmental concern is found, an appropriate conclusion will be provided.

A survey for lead-based paint, asbestos-containing building materials or an assessment of indoor air quality are not within the scope of this assessment. If an investigation for asbestos-containing building materials is desired, a United States Environmental Protection Agency/California Division of Occupational Health and Safety-Certified inspector is required to do this work. This highly regulated and specific survey will be covered under a separate proposal. We appreciate the opportunity to present our proposal to you. Please call us if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Mark Leymaster". The signature is written in a cursive style with a large, stylized initial "M".

QUESTIONNAIRES

LEYMASTER ENVIRONMENTAL CONSULTING, LLC

**5500 East Atherton Street, Suite 210
Long Beach, California 90815
(562) 799-9866 phone
(562) 799-1963 fax**

QUESTIONNAIRE

Per EPA 40 CFR Part 312 – Standards and Practices for All Appropriate Inquires, in order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *Property owner* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that “*all appropriate inquiry*” is not complete.

1. Are you aware of any environmental cleanup liens against the Property that are filed or recorded under federal, tribal, state or local law?

No
2. Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No
3. Do you have any specialized knowledge or experience related to the Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No
4. If the Property is being sold, does the purchase price being paid for this Property reasonable reflect the fair market value of the Property? If you conclude that, there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Property?

Yes

LEYMASTER ENVIRONMENTAL CONSULTING, LLC

**5500 East Atherton Street, Suite 210
Long Beach, California 90815
(562) 799-9866 phone
(562) 799-1963 fax**

5. Are you aware of commonly known or reasonably ascertainable information about the Property that would help the environmental professional to identify conditions indicative or releases or threatened releases? For example, as user,
- a. Do you know the past uses of the Property? Yes
 - b. Do you know of specific chemicals that are present or once were present at the Property? Yes, basically
 - c. Do you know of spills or other chemical releases that have taken place at the Property? No
 - d. Do you know of any environmental cleanups that have taken place at the Property? No
6. As the Property owner, based on your knowledge and experience related to the Property are there any obvious indicators that point to the presence or likely presence of contamination at the Property? NO

UNITED READY MIXED CONCRETE 13131 LOS ANGELES ST, IRWINDALE, CA, 917062296			S105422030
▲ A10	Target Property	Other Ascertainable Records	
	355 ft. Above Sea Level		

Worksheet:

HANSON STRUCTURAL PRECAST 13131 LOS ANGELES ST, IRWINDALE, CA, 917060000			S113111523
▲ A11	Target Property	Other Ascertainable Records	
	355 ft. Above Sea Level		

Worksheet:

BOB ZADINA TRUCKING INC 4600 RIVERGRADE RD, IRWINDALE, CA, 91706			S106024669
▲ 12	NNW <1/10 (375 ft. / 0.071 mi.)	Local Lists of Registered Storage Tanks Other Ascertainable Records	
	4 ft. Higher Elevation 359 ft. Above Sea Level		

Worksheet:

Impact on Target Property: VEC does not exist

Comments: The hydrologic characteristics of the physical setting suggest that vapors would not migrate from the source to the target property. Depth to groundwater is greater than 250 feet.

Conditions:

Petroleum Hydrocarbon Chemicals of Concern: YES

Groundwater Flow Gradient:

Upgradient or Indeterminate: YES

SAN GABRIEL VALLEY CORPORATE CAMPUS 4900 RIVERGRADE ROAD, IRWINDALE, CA, 91706			1000198492
▲ H13	NNE 1/10 - 1/3 (792 ft. / 0.15 mi.)	Local Lists of Registered Storage Tanks Other Ascertainable Records	
	14 ft. Higher Elevation 369 ft. Above Sea Level		

Worksheet:

MAP FINDINGS

Impact on Target Property: VEC does not exist

Comments: The source is not within the area of concern, based on its distance, gradient and suspected chemical of concern.

Conditions:

Petroleum Hydrocarbon Chemicals of Concern: YES

Groundwater Flow Gradient:

Upgradient or Indeterminate: YES

HOME SAVINGS OF AMERICA 4900 RIVERGRADE RD N, IRWINDALE, CA, 91706			S109690851
▲ H14	NNE 1/10 - 1/3	(792 ft. / 0.15 mi.)	State and tribal leaking storage tank lists Other Ascertainable Records
	14 ft. Higher Elevation	369 ft. Above Sea Level	

Worksheet:

Impact on Target Property: VEC does not exist

Comments: The source is not within the area of concern, based on its distance, gradient and suspected chemical of concern. This is a closed LUST case.

Conditions:

Petroleum Hydrocarbon Chemicals of Concern: YES

Groundwater Flow Gradient:

Upgradient or Indeterminate: YES

AGERE SYSTEMS 4920 N RIVERGRADE RD, IRWINDALE, CA, 91706			S106024779
▲ H15	NNE 1/10 - 1/3	(952 ft. / 0.18 mi.)	State and tribal leaking storage tank lists Other Ascertainable Records
	15 ft. Higher Elevation	370 ft. Above Sea Level	

Worksheet:

Impact on Target Property: VEC does not exist

Comments: The source is not within the area of concern, based on its distance, gradient and suspected chemical of concern. This is a closed LUST Case.

Conditions:

Petroleum Hydrocarbon Chemicals of Concern: YES

Groundwater Flow Gradient:

Upgradient or Indeterminate: YES
